

ASPIRATION CUBICLE

SA 7/25

Aspiration Cubicle type SA 7/25 produced by TAURUS, s.r.o., Chrudim, is a machine designed for separation of grains from impurities and contaminants with lower buoyancy speed than the sorted product.

Simultaneously, ferromagnetic contaminants are also being removed.

The Machine is designed for integration into technological units for post-harvest grain treatment and similar industrial operations consisting of storage equipment and connected technological equipment for processing of dry bulk materials.

| Item | | Unit | Version | |
|------------------|-------------------|---------------------|--------------|--|
| | | | SA 7/25 | |
| Basic dimensions | length | mm | 1 180 | |
| | width | | 445 | |
| | height | | 2 290 | |
| Weight | total | kg | 146 | |
| | split magnet 1 pc | | approx. 15.7 | |
| Air quantity | | m ³ /min | 72 | |
| Pressure loss | | Pa | 530 | |
| Capacity * | | m ³ /hod | | |
| - sorting | | | 5 – 9.3 | |
| - pre-cleaning | | | 25 - 33 | |
